	Examiner Paul Marcantoni	Art Unit 1755	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The applicants' election with Traverse of Group III is respectfully acknowledged. Response to the traverse of the restriction will be made after this election of species.

This application contains claims for Group III (claims 47-57 and 90) directed to the following patentably distinct species: *pigments* and *thixotropic additives*. The species are independent or distinct because of their mutually exclusive characteristics. Currently claim 47 is generic.

Pigments: (must elect inorganic or organic but not both)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for pigments (organic or metal inorganic pigment) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Should applicants elect inorganic metal pigments, they are referred to claim 52 and are respectfully requested to elect a specific metal inorganic pigment or specific metal inorganic pigment mixture of claim 52.

Should applicants elect organic metal pigments, no further action regarding pigment Markush groups is necessary (claim 54 teaches one organic pigment).

Thixotropic Additive:

Applicants are respectfully requested to elect the specific thixotropic additive of claim 55 or the specific mixture of thixotropic additives of claim 55.

Applicant is advised that a reply to this requirement must include an identification of the species for pigment and thixotropic additive above that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
